Subject: moratorium on medium and large swine CAFOs
Date: Tuesday, September 17, 2019 10:24:53 PM

Greetings,

I am a science teacher with an M.S. in Fisheries and Wildlife. I have a deep concern for water quality in Arkansas. I am concerned that with the amount of karst topography in our beautiful state, we should make permanent the moratorium on medium and large swine CAFOs. We can't expect rock layers that are much like honey combs to filter out microbes, N, and P from swine defecation. It is just too easy to ruin our beautiful rivers and lakes--and our drinking water.

Please work to make the moratorium permanent.

Thank you for your consideration.

regards,

Margaret M. Britain
